

EarBot – Online Coding Internship

EarBot is online support portal for music system products. This project is made using Bootstrap components such as Navbar, Jumbotron, Container, Carousel, Grid System and many more. You have to create same project with HTML, CSS, and JS & Bootstrap.

Reference for Bootstrap:

- <https://getbootstrap.com/docs/4.3/getting-started/introduction/>
- <https://www.w3schools.com/bootstrap4/>

1. Welcome Page

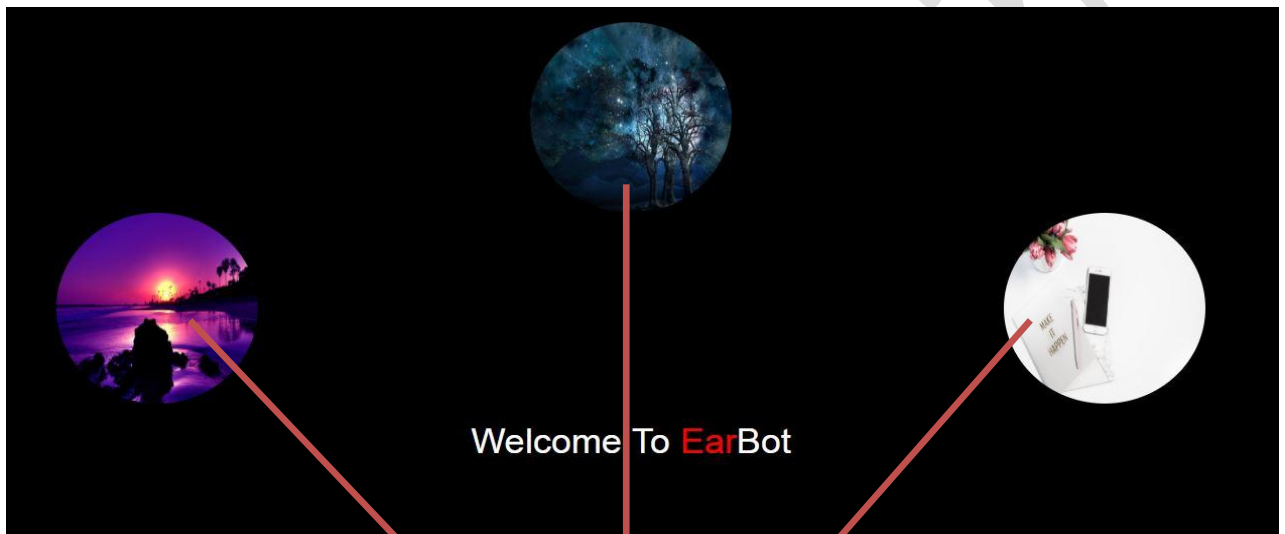

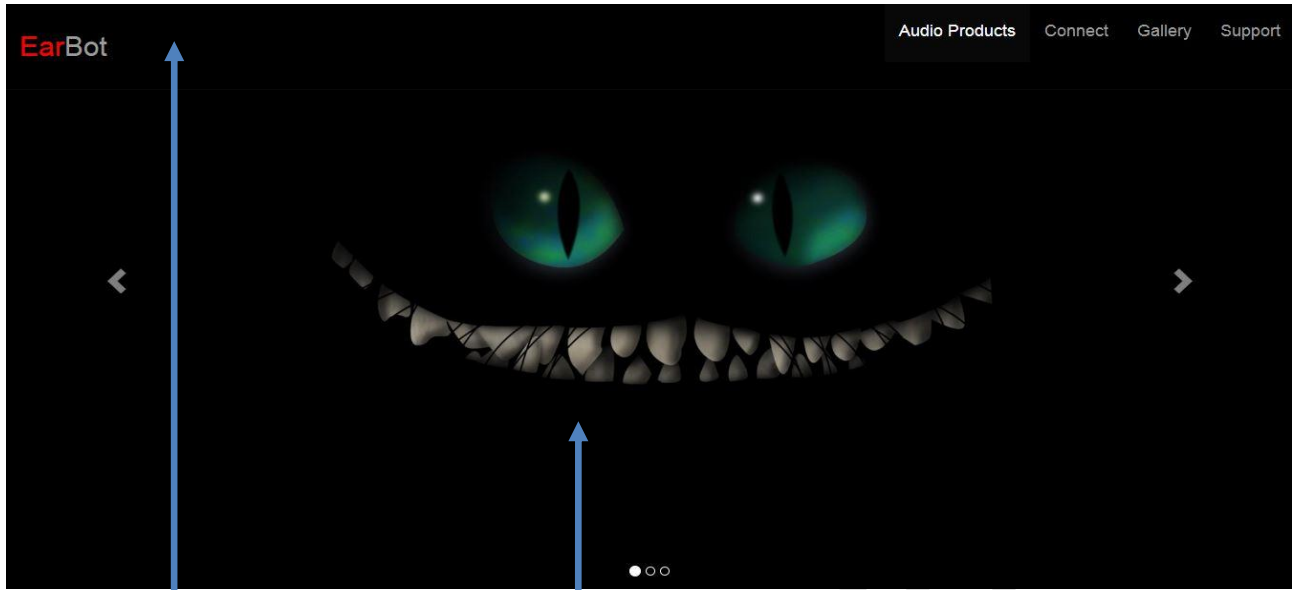

Image with **img-circle** bootstrap class. Apply **-webkit-transform: rotate(360deg);** property as well as hyperlink for home page when user hovers on the images.

2. Home Page

- **Navbar** – Fixed with inverse
- **Carousel effect to show the images**
- **Bootstrap Grid** – No Padding
- **Hover effect on Image Gallery**

EarBot – Online Coding Internship

Navbar (Fixed & Inverse)

Carousel (Image Scrolling)

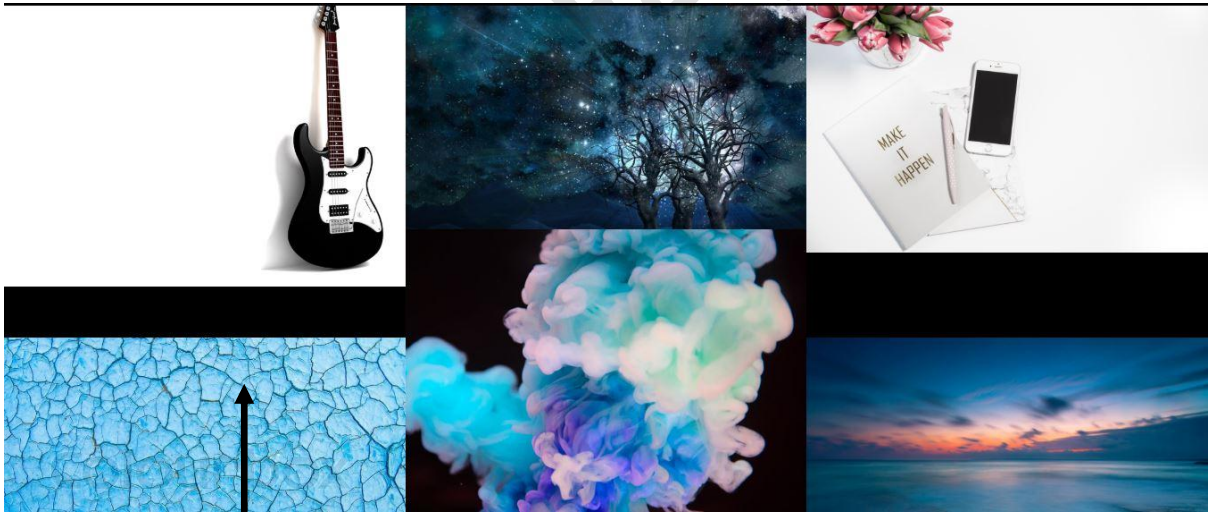

Image Placed in one container with **padding and margin set to 0.**
